

Remarks

Claims 1-13 remain pending in the application and have been allowed.

The specification, Abstract and Claims 10 and 12 are proposed to be amended herein to correct minor errors and improve their form. The changes to Claim 10 are proposed to eliminate the redundancy of the claimed second detecting step and the second controlling step in Claim 9. The change to Claim 12 is proposed to provide clearer antecedent basis for “real time data.” The changes are not proposed to be made for any reasons related to patentability.

It is respectfully submitted that the proposed amendments do not add new matter and do not affect the allowability of the application. The need for the proposed changes was only recently discovered and their entry would not place undue burden on the Patent and Trademark Office.

Favorable consideration and entry hereof are earnestly solicited.

Applicant's undersigned attorney may be reached in our Washington, D.C. office by telephone at (202) 530-1010. All correspondence should continue to be directed to our below-listed address.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "Mark A. Williamson", written over a horizontal line.
